History

At Ravensden Primary we want all of our children to have an understanding of our past and how History will shape their future.

Our History curriculum is designed in a way that leave children with a wealth of knowledge on how times have changed across Britain and Worldwide. It will equip and encourage the children to ask questions, think critically, use high-order vocabulary and develop a knowledge of chronology so children can organise their understanding of the past.

Our History curriculum will be full of topics which foster awe and wonder and drive children to ask the question why. Through enrichment opportunities the History curriculum is enhanced through the addition of visitors to the school, drama, use of artefacts and day trips.
