

Introducing Select

We are pleased to introduce Select, our menu ordering and payment system for Primary Schools.

Select offers a simple solution for parents to choose and monitor their child's school meals. It's available for both paid and free school meal customers.

For Schools, the system brings numerous benefits including:

- **A quick efficient service with minimum support required**
- **Removes handling of cash and manual recording**
- **Provides accurate numbers of pupil uptake**
- **Ensures enough portions for all pupils**
- **Pupils get their first choice of food, cutting down on confusion**
- **Coloured wristbands are used corresponding to meal choice to help speed of service**

For Parents:

- **Removes dealing with cash and cheques**
- **Ensures child receives lunch they ordered**
- **Can place advance orders for any date in the current school term**
- **Ability to amend payments if pupil is away from school**
- **Record any specific dietary requirements**

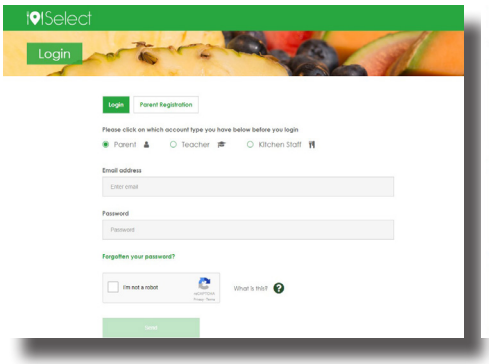

Payments are made securely via Stripe with credit and debit cards.

School payments made simple

Registering is easy

Parents register and then log into the online system to view the current menu along with current promotions. Each term a new menu will be available, from which parents can review and pre-select meals for the days they choose.

The system is not just about payments though, it's about planning school meals to ensure a successful lunch service for everyone involved.

Parent Registration

The first stage of the process is to create an account with an email address. An email is sent to verify the account.

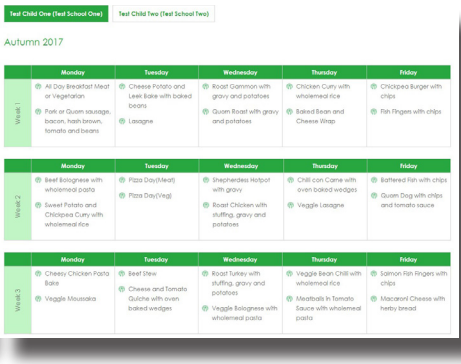

Each school is allocated a unique code, in addition to a specific code for each child.

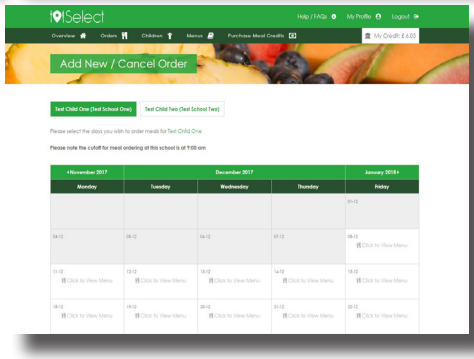

For example:

School Code - 123456
Child Code - 12345678

Multiple children can be registered on one login.

These details will only need to be entered once. Future logins will only need an email and a password.

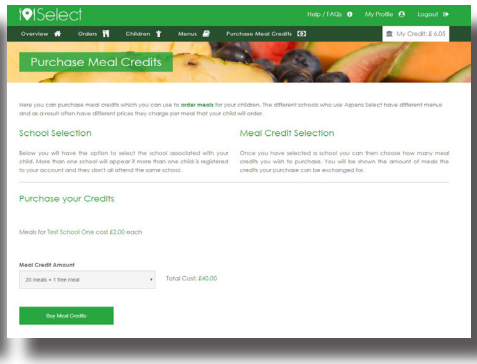

Ordering

Once registered, choosing meals is easy. By selecting 'Add New', a calendar is displayed with each available menu option for that day.

Orders can be taken daily, weekly or for a full term in advance. There is also a function to cancel any meal if required.

Once all orders are placed, a list of children, their meal choices for that day are forwarded to the school's representative.

Payment

For those children who are eligible for FREE school meals or universal Free school meals, accounts will be credited accordingly. If payment is required, details can be added at this stage.

When meal credits are purchased they are added to the account.

The system shows the amount of meals the credits purchased can be exchanged for. This screen will highlight any bulk purchase deals available.

An account balance can be seen on the main page at all times.

Select

School payments made simple

We support parents fully in registering and setting up their accounts – we even have a selection of videos we can share which run through each of the steps clearly.

The system provides a great database of information about the most and least popular meals, along with the children's specific nutrition and allergy information. It is a great tool to support menu development for schools in the future.
